	rate for money currency exchanges. This rate is set by us. It is a variable exchange rate and is constantly changing. This means that the money currency buy and sell rates are determined based on data feeds from a range of independent sources, as well as the amount of the transaction. You can view the currency exchange rate on our website or in-app. Exchange rates will be the same whether it's done as an in-app exchange, an exchange for a transfer, or an exchange for a payment. We add an exchange fee(if one applies). The fee we charge (if one applies) is an exchange fee. This is a variable fee (which means it is constantly changing) depending on the parameters of your exchange (like what you are exchanging and when). If you exceed this limit, you will be charged a fair usage fee on the additional amount. The fair usage fee may be different for different conversions, so please check the terms and conditions which apply to any conversions that are not money currency conversions provided by us (Revolut Bank UAB). Card transfers	A fee applies for card transfers. This means payment directed to a supported non-Revolut card number, made using the Revolut app. This fee will be calculated in real time and shown to you in the app before you confirm the payment. The exact fee will

Service	Fee
	depend on the transaction itself (for example, on how much you are sending and where to). You can also see our live fees here.
All other international payments	A fee applies for international payments. You can also see our live fees here. You will receive a 100% discount on the fee for any international payments you make, regardless of the number of international payments that you make. The 100% discount on the fee will be calculated for each international payment you make. The fee (including the discount) will be calculated in real time and shown to you in the app before you make the payment. The exact fee will depend on what currency you are sending and where you are sending it to but our maximum fees are capped. This means any international payment (other than a payment within the Single Euro Payments Area, as set out above).
Pay All Fees feature	When you make an international payment, intermediary banks may deduct fees from the amount you sent. Our "Pay All Fees" feature allows you to pay a flat upfront fee which guarantees that the recipient receives the full amount. This will be charged instead of the standard international payment fee. The amount of the fee depends on your base currency. It can change from time to time, but you will always see the current fee in the app before you agree to the transfer. You can see our current fees and the routes where this feature is available on our pricing page here. A discount on this fee (if any) will be applied according to your price plan in the same way as for other international payment fees.
Exchange	
Exchanging money currencies	No exchange limit. No fair usage fee.

Service	Fee
	Whenever you make a money currency exchange using Revolut Bank within your plan's exchange limit: You get the Revolut exchange rate. We use our own Revolut exchange rate for money currency exchanges. This rate is set by us. It is a variable exchange rate and is constantly changing. This means that the money currency buy and sell rates are determined based on data feeds from a range of independent sources, as well as the amount of the transaction. You can view the currency exchange rate on our website or in-app. Exchange rates will be the same whether it's done as an in-app exchange, an exchange for a transfer, or an exchange for a payment. We add an exchange fee(if one applies). The fee we charge (if one applies) is an exchange fee. This is a variable fee (which means it is constantly changing) depending on the parameters of your exchange (like what you are exchanging and when). You can see what this fee is in the app. Please see our FAQs for more information about the money currency exchange, Revolut exchange rate and exchange fee. Where possible, we will tell you the total cost before you make the exchange. The only exception, where it is not possible to show you the total cost in advance, is when you make a card purchase that requires an exchange to take place in real time (for example, you make a purchase in USD, but you do not have a USD balance, meaning we need to perform the conversion in real time for you). However, after the transaction, you will be able to view

Service	Fee
	the breakdown of the total cost within the app.
Other	
Administration fee	€2.3 per month (this only applies if we decide to close your account and there is still money remaining after the account closure notice period has passed. This fee will be applied to cover our costs for holding and administrating your remaining money. Please see more information about this fee in our Personal terms).

Merchant Chargebacks

If one of your customers disputes a transaction, they can raise a 'chargeback' request. For example, they may do so if they allege a transaction was fraudulent or a product was counterfeit or not delivered. If the chargeback is successful, the transaction will be refunded, but you'll be charged a chargeback fee. The chargeback fee depends on the currency of the original transaction, as set out below. You may be able to challenge the chargeback request.

There is more information about disputes and chargebacks in our [Payment Processing Services Agreement](#).

The amount of the chargeback fee depends on the currency of the original transaction. If you provide evidence that the transaction has been legitimate and you delivered products or services according to the agreement with the customer, the issuer bank might revert the chargeback and you will also get the chargeback fee reverted back to your Revolut Pro account.
